

Overview

Advanced FileMaker Pro Solutions covers topics for building better multi-user relational databases in FileMaker Pro. The course includes advanced calculations and scripting techniques, security and FileMaker Server. It covers the FileMaker Training Series modules 5, 6, 8, 9 and 10. At the completion of this course, you be able to use more advanced techniques to build better FileMaker Pro solutions. You will receive a certificate of completion.

Course Length & Pricing

2 days, \$AUD1080 (inc GST) \$NZD1250 (no GST)

Who Should Attend

Anyone with some experience building FileMaker Pro solutions who wants to learn more advanced techniques to build complex multi-user solutions.

Prerequisites

You should be familiar with the MacOS or Windows XP operating system. You should have used FileMaker Pro to create a database, create basic layouts and work with records. Previous experience with a word processor and/or spreadsheet is helpful.

Terms & Conditions

All courses are subject to minimum registration numbers. uLearnIT reserves the right to cancel any class within 10 business days of its scheduled starting date. Participants must cancel at least 10 business days prior to a class for a full refund. With less than 10 business days notice, no refund will be provided. A substitute may be sent if you are unable to attend a course.

Course Outline

Data Modeling

Review of data modeling concepts

Calculation Functions

Using functions in the calculation engine and apply in various contexts

Scripts

Best practices for writing scripts including use of Script Triggers

Intermediate & Advanced Techniques

Relational value lists, dynamic portal sorting, filtering, row highlights

Security

Security model, using privilege sets, external authentication, scripted security

FileMaker Server

Best practices for setup; server-side scripts; backup routines
